

First-order beliefs: Lithuania vs Germany

Mean per construct on a 1–7 scale; whiskers = 95 % CI. Dotted vertical reference at the scale mid-point (4). Constructs are grouped by their parent higher-order composite (Threat / Betrayal / Fear / Foreign-power admiration); within each block, ordered by the absolute LT–DE gap (largest at top).

Lithuania (S2, n = 582) vs Germany (S3, n = 782). Mean of each first-order DisInforMeter construct on a 1–7 scale, with 95 % confidence intervals. Constructs are grouped by their parent higher-order composite (Threat → Betrayal / abandonment → Fear / pragmatism → Foreign-power admiration) and, within each group, sorted by the absolute LT–DE gap (largest gap on top). N = 1,364.
