

Affective profile across S4 country clusters

Each polygon is the N-weighted cluster mean on the five higher-order DisInforMeter domains.
Faint grey polygon = pan-European pooled mean.

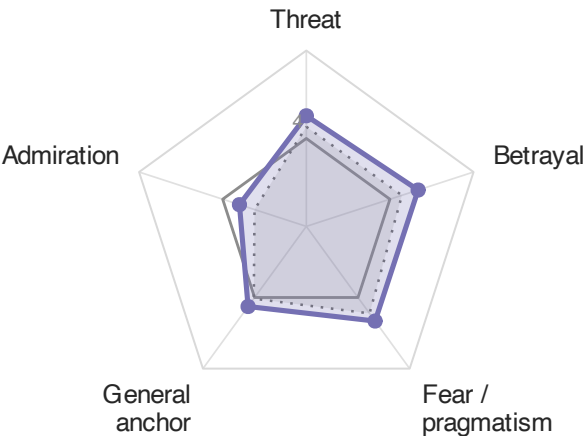

Baltic (n = 1,793)

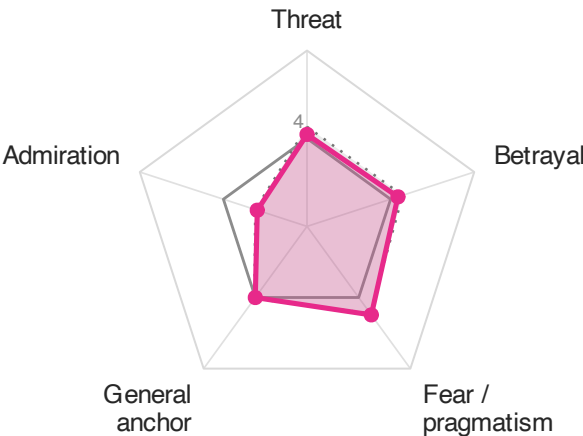

Central-East (n = 1,791)

Southern (n = 1,811)

Western (n = 2,388)

S4 (2025). Cluster polygons show N-weighted means of the five higher-order affective domains on a 1–7 scale. Faint dotted ring overlay = pan-European pooled mean. Eastern-neighbourhood cluster is excluded for the current report cut (residence data pending). N = 7,783.
