

Hungary — DisInforMeter snapshot

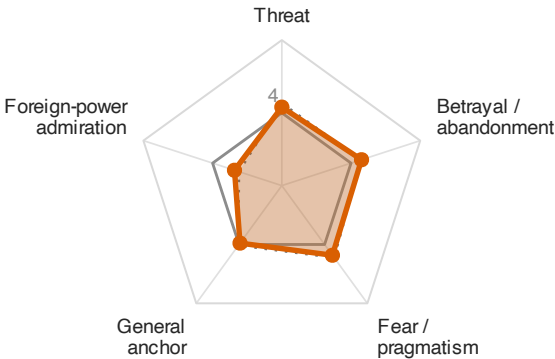

S4 (December 2025) | N = 599 | Overall FIMI rank: 7 of 13

FIMI detection vs EU range

Country mean (dot), 95 % CI; grey band = EU country min-to-max range; tick = EU pooled mean Country polygon vs EU pooled-mean (grey)

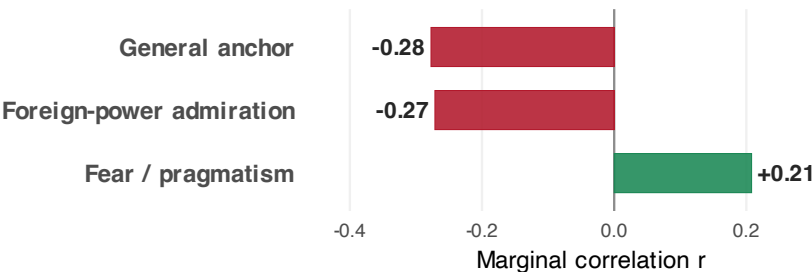

Five-domain profile

What drives FIMI here

Top-3 country-specific marginal r (factor scores; [-1, +1])

Higher predictor → higher FIMI Higher predictor → lower FIMI

S4 (2025) — Hungary (cluster: Central-East). FIMI detection bar shows country mean and 95 % CI against the EU country min-to-max range (tick = pooled mean). Radar axes (clockwise): Threat, Betrayal / abandonment, Fear / pragmatism, General anchor, Foreign-power admiration; perimeter = 7. Predictor bar = top-3 country-specific marginal correlations of higher-order factor scores with full FIMI (n.s. flagged inline). N = 599.
